---

Full Stack Developer with more than 3 years as a QA Analyst and Automation Developer at AFIP specialized in testing and automation with Python where I have been able to carry out projects in my charge regarding their approval and it is a knowledge and capacity that I can use to contribute to a future position as a developer. Previously, I worked as a Backend Developer with PHP for approximately 1 year developing REST APIs and integrating with third-party APIs. Thanks to my experiences I am a positive, persevering person, who likes to work in a team and collaborate to solve problems that arise and capable of carrying out a project on my own. English level: Advanced.

### PROJECTS

#### Full Stack Web Developer – Groove Tickets

feb.23 – mar.23
